Arizona Corporation Commission

DOCKETED

DEC 24 2014

DOCKETED BY

Comments: I am, as a customer of EPCOR, expressing my extreme displeasure with EPCOR petitioning to the Arizona Corporation Commission, to raise our sewer rates for following reasons: The Bullhead City, AZ is currently charging about one half (\$30.00 vs \$56.67) of what EPCOR charges for the same service. Two, The Mojave Indian Tribe charges a similar rate as Bullhead City for the same service. Three, EPCOR charges more than twice the quantity for sewer as I pay for water provided by Utilities Inc. (formally Bermuda Water) (average monthly bill \$23.00). EPCOR charges me for sewer from April to September when I am not living in the house and the water is shut off going into the house. Three, EPCOR claims the have to raise rates because they expanded their capacity. Their failure to read the housing market is NOT my problem. I am a retired Vice President of Manufacturing, and if I brought a product to market and or expanded my manufacturing capacity and the market turned down I HAD TO EAT THE COSTS. EPCOR is no different they need to manage their business at the current rate which I still consider TOO HIGH for services they provide .
